

20 years promoting the interaction between the participants of the Sustainable Global Food System

Triptolemos Foundation is a private and international entity. It promotes the development of the **Sustainable Global Food System** which it defines in 4 interrelated areas: Accessibility and Availability, Economy, Policies and Knowledge, in the conviction that there can be no sustainable and socially balanced development if the balance between the 4 areas is not maintained simultaneously.

The **objective** is to contribute with its actions to an adequate and sustainable diet which citizens can trust, for the entire population, in accordance with knowledge, science and technology. The motor of the system is responsible business activity. The challenges we face involve the whole of society.

Its members include representatives of the entire Food System:

## TRIPTOLEMOS FOUNDATION MEMBERS

We invite you to participate in the activities of Triptolemos Foundation in the development of the Sustainable Global Food System.

It is open to any new addition that shares its goals.
